

Gift List

Three toasters, two sets of cutlery, four sets of sheets. This does not get is quite unnecessary gifts. This is a fairly embarrassing problem, and sort of embarrassing. By all means, however. The solution to the problem are two simple words LIST gifts. Our guests also depends on the newlyweds happiness.

How does it do?

STEP 1

We made list of things that we would like to get. This list can be arranged with groups of price ranges that each guest can find something for your pocket. It is important that the list was much more than score. Avoid the situation of someone to force us to buy a washing machine that goes beyond its financial capabilities.

STEP 2

The second step is to "release the list in circulation." And here we find two exits. The choice depends on ourselves. One possibility is handing the list to each person individually. However, do not do it during the ceremony invitations. Best to wait several days, then we should get confirmation of the invited to our wedding. The second possibility is less embarrassing. Make a list of gifts in the wedding scrapbook. This way you have set aside over presents. This is so much better about the way that visitors choosing a gift from the list can go immediately unhook (book), which further excludes the possibility of us receiving duplicate gifts. Gifts that are disappearing from the reserved list (on the score). Personally, I recommend such a solution to this rather complicated subject. It is less embarrassing for us and so also for the guests. So do not be afraid of their own and make a list of gifts.
